Profile Summary

Associate Software Engineer experienced in production ERP and full-stack applications using Java, Spring Boot, React.js, Next.js, Node.js, PostgreSQL, MySQL, and Redis. Skilled in REST APIs, microservices, authentication, authorization, RBAC, third-party integrations, data migration, and database-driven systems. Experienced in building secure backend services, automation workflows, biometric integrations, and real-time applications. Strong foundation in DSA, OOP, and System Design with a focus on scalable and maintainable software.

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Backend:** Spring Boot, Spring Data JPA, Node.js, Express.js, REST APIs, Microservices Architecture
- **Frontend:** React.js, Next.js
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Security:** JWT, Authentication, Authorization, RBAC, API Security
- **Core:** Data Structures & Algorithms, Object-Oriented Programming, System Design, API Design, Database Design.
- **Tools:** Git, GitHub, Docker, Kubernetes, Postman, CI/CD

Experience

Associate Software Engineer, SkyllX Technologies Pvt. Ltd.

Jun 2026 – Present

Java Full Stack Developer

- Develop and maintain production ERP applications using Java, Spring Boot, React.js, Next.js, MySQL, PostgreSQL, and microservices, building scalable REST APIs and business workflows for academic and administrative operations.
- Engineered secure backend services with JWT-based authentication, authorization, and RBAC, implementing role-specific access control across student, staff, administrator, and organization workflows.
- Built production integrations for Email, SMS, WhatsApp, biometric devices, and GPS tracking, including MSG91 APIs, biometric synchronization, attendance processing, and real-time vehicle telemetry.
- Developed automated data migration workflows with validated Excel imports and duplicate prevention, while optimizing database queries, debugging production issues, and improving API reliability.

Projects

HR Portal

[GitHub](#)

Spring Boot, Next.js, PostgreSQL, Redis

- Built a full-stack placement management platform using Spring Boot, Next.js, PostgreSQL, and Redis, supporting placement drives, student applications, recruiter workflows, and end-to-end candidate tracking.
- Implemented JWT authentication, RBAC, REST APIs, search and filtering workflows, and Redis-based session management and caching for secure, high-performance application operations.

Online Voting Application

[GitHub](#)

PERN Stack

- Developed a secure, scalable online voting platform using PostgreSQL, Express.js, React.js, and Node.js with REST APIs for voter management, election configuration, voting, and result processing.
- Implemented role-based authentication, secure vote storage, real-time result updates, and interactive dashboards to support reliable election workflows and data integrity.

Education

MS Engineering College, Bengaluru

Dec 2022 – Jul 2026

Bachelor of Engineering in Computer Science

CGPA: 8.12

Chandrekant Patil PU College, Kalaburgi

2020 – 2022

Pre-University

70%

Certificates

Software Engineer Certificate - HackerRank
